

# LANDSYSTEMS NURSERY

## WINTER WATERING ALERT!

According to the news, Central Oregon is suffering from severe drought conditions. This means it is more important than ever to water your plantings through out the winter. Watering systems should be turned off, so on any nice day use a hose or watering can to give your plants a drink. This is especially important for new plantings. A snow fall or light rain will NOT be enough to get your plants through the winter.

CHRISTMAS WILL BE HERE BEFORE YOU KNOW IT.  
FIND EVERYTHING FOR CHRISTMAS AT  
LANDSYSTEMS NURSERY.

## OUR TREES HAVE ARRIVED!! *GOURMET CHRISTMAS TREES*

**LIVE...FRESH CUT...FLOCKED**

There's still time to send this holiday delight!

## POINSETTIAS ARE HERE!

Nothing says Christmas like a spectacular poinsettia!! We have a variety of colors and sizes. Check out the spectacular new varieties such as Ice Crystal, Jester Jingle, and Gold Rush. Ours are the prettiest in town! Available in 4" and 6.5"

### CARING FOR YOUR POINSETTIA

Poinsettias are semi-tropical and like to be moist, not too dry or wet. Drain any excess water as the roots don't like to be too wet. Pick a bright spot indoors away from chilly windows, drafty doors, and breezy furnace vents. Add some poinsettia fertilizer for longer blooming.

Don't forget about the other beautiful holiday flowers! **CHRISTMAS CACTI** are a great tradition, with families passing them down for generations! **HELLEBORES** bloom now and can be transplanted into your garden in the spring for a perennial display. **CYCLAMEN** give a splash of color to any home. The gorgeous **AMARYLLIS** is eye-catching with its large blooms and graceful foliage. Color your house with nature !!

### Bring a little nostalgia to your Christmas with a flocked tree.

Flocked trees became popular in the 1940's and 1950's because of TV, but were "invented" in the late 1800's when decorators created the illusion of snow-covered branches by wrapping strips of cotton batting around leafless branches. We all know they are beautiful, but the flocking actually helps preserve the moisture in the tree. We flock trees up to 11ft. tall. Buy one from us or bring your own.

### A LIVING CHRISTMAS TREE

A living Christmas tree is a gift that will bring pleasure for years to come. Here are some tips for caring for a living tree: Transition the tree by going from outside to the garage to the indoors gradually (2-4 days.) Place the tree away from direct heat in a well lit area. Keep your tree watered by using ice

cubes. They melt slowly and help to prevent a drainage problem. It is best to keep your living tree inside for no more than a week to ten days.

Plant your tree using our planting guide and enjoy it for years!  
**We can deliver your tree and arrange to plant it after the holidays.**

Choose the latest and greatest in Christmas ornaments. All your favorites plus everything that's new.

**THEME ORNAMENTS.. SPORTS ORNAMENTS..  
"SPECIAL PERSON" ORNAMENTS..**
